

Fishing update from Mike Davis. 19 June 2011

--There was a good Splake season this year however the fish were a bit later than in years past.

--The Sucker run was better than average this Spring

--Perch are starting to bite at Hessel Pier (east end) and in Moscoe Bay.

There are rumors that Middle Entrance Perch are biting but no one is talking!

--Trolling for Pike is getting active, they too are late due to a cold and wet May.

--Bass are going on their beds now but will finish spawning after Father's Day weekend.

Not many people fishing. Resorts are empty but summer looks good as reservations have been made for the up coming weeks. The word is out the Perch are back! Most down state schools did not get out until the week of June 13.

That's it for now, hope your bobber goes down and you get a big one...
